for accurate painting and trimming off after roller painting around window frames, doorways etc. the long handle provides extra control

roller cover guide

mohair 5mm nap

for an exceptionally smooth and even finish, this cover can be used with turps, solvent or oil-based paints on smooth and semi-smooth surfaces

universal 10mm nap

for an extra smooth finish with no splatter, this cover is ideal for use with undercoat, gloss, semi-gloss, plastic, acrylic and vinyl finishes on smooth and semi-smooth surfaces

ultracover 12mm nap

ideal with water-based paints on smooth surfaces. gives a slight stipple finish with minimal splatter

foam

this cover achieves a smooth finish that is similar to spray painting and should be used with solvent-based paints

lambskin 12-14mm, 16-18mm & 20-20mm nap

a pure woven lambswool cover which ensures a high paint carrying capacity and is ideal for applying flat paints and undercoats on ceilings and walls. suitable for use with water-based and solvent-based paints

ultracover 18mm nap

this cover reaches into recesses of rough and semi-rough surfaces and is used with water-based paints

texture

with a nylon loop pile this cover is ideal for texture effects and works best with specially formulated texture paints

ultracover 25mm nap

used with water based paints this cover allows you to get into recesses of rough and very-rough surfaces

Better finishes start with Rokset
