perfectly beautiful simplicity

OPTICAL VENEER

an exceptional choice

Optical Veneer by Rokset Innovations is a high gloss polymer panel suitable for most internal vertical applications as a practical and economical alternative to glass panelling. In bathrooms, kitchen and laundries, in residential and commercial projects, it offers exceptional advantages. The contemporary colours and high gloss finish add real impact.

a clear advantage

Optical Veneer has many advantages over painted glass for use in the equivalent applications

- More economical on price per square metre
- Scratch resistant solid polymer layer
- Handles like mdf or particleboard. The same tools are used to prepare, cut and install
- Lighter weight – approximately half the weight of glass panels of the same thickness
- Cut to size on site – reducing lead time
- Full 10 year indoor UV warranty

a sublime finish

Surfaces with a high gloss reflection in fashion colour deliver true contemporary style. Optical Veneer does the job, it's a clever alternative to painted glass and two-pack paint finishes for extreme shine in the latest colours.

The shades in the colour card have been especially designed, based on international colour forecasts; they are elegant, livable and on trend. Specifiers can also order custom colours for larger projects.

Optical Veneer is a win, win, building material. Specifiers respond to the design opportunities with Optical Veneer; builders like having less trades on site and tradesmen are grateful for the ease of working with material that won't shatter like glass. Clients love the cost and the modern look.

Optical Veneer delivers a fabulous finish for both residential and commercial projects.

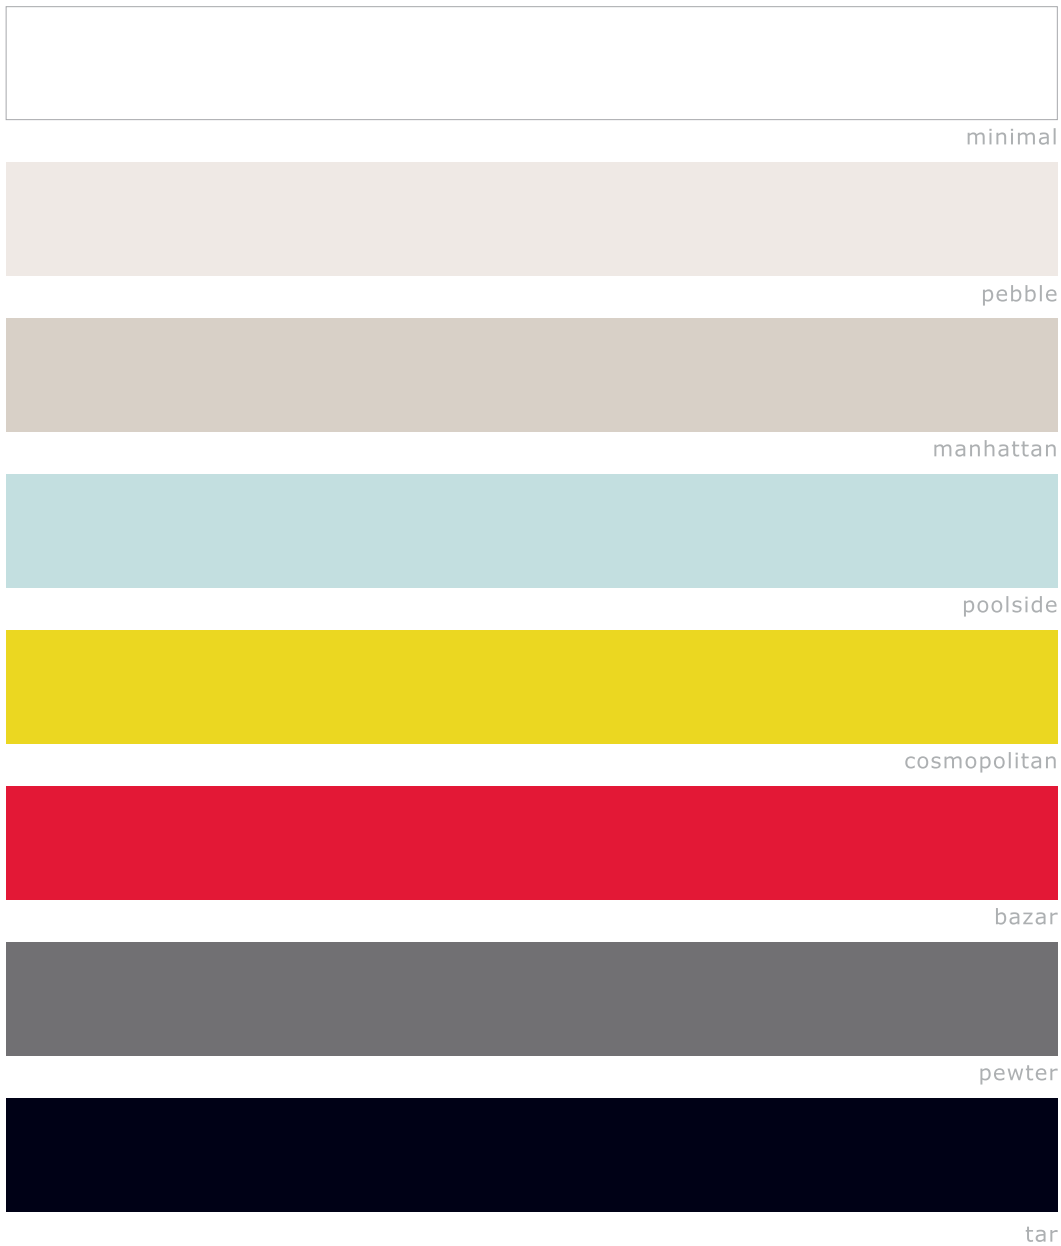

- Splashbacks in kitchens, bathrooms and laundries: waterproofing without tiling or glass.
- Cladding walls in offices: flashes of colour and reflections appear to create illusion of greater space.
- Partitions in open plan residential or commercial spaces.
- Cupboards matched to the splashback give an expensive look of integrated design.
- Wardrobe doors in bedrooms and dressing rooms become beautifully sleek with a minimalist style .
- Office reception areas in contemporary shine give a modern vibe.
- High gloss, vibrant colour Optical Veneer creates a striking feature wall.
- In a room painted in a flat finish, Optical Veneer in the same colour as the paint creates a subtle feature wall.
- Retail outlets can be decorated in corporate colours.

OPTICAL VENEER

neo urban colour collection

The Optical Veneer colours have been chosen for their beauty, livability and fashion. Customised colours and sizes can be ordered for large projects.
